

EVV denial decoder for Indiana home care claims

NAHL TECHNOLOGIES INC. · INDIANAPOLIS · OCTOBER 2026

The EVV denial codes used by Indiana fee for service and the three PathWays plans: what each means, what causes it, and the fix. Pin beside the billing screen.

Indiana fee for service (IHCP portal, H&W waiver clients)

CODE	WHAT THE REMITTANCE SAYS	WHY IT HAPPENED	FIX BEFORE YOU RESUBMIT
0950 / 0951	Matching EVV data not found. The EVV record is not present or does not match all EVV visit information.	No Verified visit in the Sandata Aggregator for that member, date, service, payer and billing provider. Common causes: alternate vendor had not uploaded yet; wrong EVV payer ID on the client record (INFSSA, INATM, INHUM, INUHC); caregiver picked the wrong service; visit still Incomplete (no clock out).	Open the Aggregator and confirm the visit shows Verified for that exact date. If it was added after you billed, rebill. If it is missing, check the payer ID, the service code and modifier, and the member ID against the claim line, then fix the visit or the claim.
0952	EVV Aggregator units less than units submitted on the claim.	You billed more 15 minute units than the verified visits add up to. Causes: an exception left uncleared; a visit crossing midnight or the month boundary; rounding (7 minutes or less does not round up, 8 or more does; each EVV visit record stands alone).	Clear the exceptions, recount units per day with the 8 minute rule, and rebill the lower number. Never put two months on one claim detail.
0958 / 0959	Suspended for the same two reasons as 0950 and 0952.	The claim is held, not denied, while the EVV record is checked.	Same checks as above; the claim releases when the record matches.
4405	Missing family or attendant caregiver name and relationship to member.	Every SFC and attendant care claim needs a claim note reading NAME: First Last REL: Spouse (or Parent of minor child, or Other). No other wording is accepted.	Add the note in CMS 1500 field 19, the portal Note Text, or 837P loop 2300 NTE with NTE01 = ADD, then resubmit.
6492	Service not allowed in the same month as paid structured family caregiving.	Attendant care or home and community assistance was billed in a month that already paid SFC for the same member.	Only SFC pays that month. If an SFC line denied on the same claim and pulled the attendant care line with it, list SFC first or on its own claim.

PathWays for Aging managed care plans (Avality and the UHC portal)

PAYER	CODE	WHAT IT MEANS	WHY IT HAPPENED	FIX
Humana	86E	Claim lines not verified by EVV vendor Sandata.	Visit not found; billed units above EVV units; visit edited after billing; or the claim went out under your medical NPI profile instead of the atypical HCBS profile, so Sandata could not match on the waiver Medicaid ID.	Confirm Verified in the Aggregator, correct the units, bill under the atypical Avality profile with the waiver Medicaid ID, resubmit as a corrected claim (frequency code 7, original claim number referenced).
UnitedHealthcare	OK5	No visit found in the Sandata Aggregator.	Billed before the visit was validated; caregiver data sent to the wrong MCE; wrong patient ID; missing time; late or duplicate loads.	Validate in Sandata, then submit a corrected claim within 90 days of the EOB date. Answer "No" in box 33 so UHC adds the G2 qualifier; do not bill with an NPI.
UnitedHealthcare	OH1	Only part of the billed units matched for the date.	Units on the claim exceed the verified visit time.	Correct the Sandata time or submit a corrected claim for the matched units.
Anthem	ZII	Sandata could not match the claim to an EVV visit.	Usually an alternate vendor not transmitting daily; on a multi date claim, every date needs its own visit.	Confirm daily uploads, confirm a visit for each date, resubmit.
Anthem	ZIH	Billed units do not match visit units.	Quarter hour rounding or an uncleared exception.	Recount with the 8 minute rule, resubmit with the correct units.
Anthem	ZVU	Sandata did not respond.	Provider ID error: missing digits, NPI and LPI swapped, or a TIN used where an ID belongs.	Resubmit with the correct identifiers.

The three rules that prevent most of these.

1. The visit must show Verified in the Aggregator before the claim leaves. 2. One calendar month per claim detail; EVV only matches inside the month billed. 3. Units count per visit record: 7 minutes or less is no unit, 8 or more rounds up.

Clocks that run while you fix it.

PathWays timely filing: 90 days from the date of service, all three plans. Corrected claims: Humana 90 days from service or 60 from the outcome; UHC 90 days from the EOB; Anthem all follow ups within 90 days. Fee for service: 180 days. A free state pre check exists: email inxixevv@gainwelltechnologies.com with your provider name, IHCP ID and Sandata STX ID; answer within 48 business hours.
