

Before a substitute DSP takes a residential shift

NAHL TECHNOLOGIES INC. · INDIANAPOLIS · OCTOBER 2026

Ten checks a house supervisor makes after a call-off, each with the rule behind it. Keep by the on-call phone.

- ☐ **Certified on the HCSP Training Registry, and not expired.**
Check the public registry for the name, the completion date and the expiry. Certificates last one year; recertification is due 9 to 12 months after first completion. No certificate, no shift under CIH or FS.
HCSP FAQs, June 30, 2025; Self-Direction HCSP FAQs; HCSP Training Registry page
- ☐ **Background check on file and dated before tonight.**
Indiana limited criminal history plus county checks for each county of residence in the last three years, and a nurse aide registry report with no finding; no disqualifying convictions.
460 IAC 6-10-5
- ☐ **Eighteen or older, able to follow the plan.**
Able to complete the required forms, follow written and oral instructions, and deliver this individual's support plan; has read the plan for this home before the shift starts, not during it.
460 IAC 6-14-5
- ☐ **Required trainings complete before working with anyone.**
Rights protection, person centered planning and the ISP, medication administration, first aid and CPR, infection control, individual specific treatments (seizures, behavior, diet, swallowing, crises), emergency drills.
460 IAC 6-14-4(a), (c) and (d)
- ☐ **Trained on this individual's behavior support plan, this year.**
BSP training before working with the person and annually; CPR retrained every two years; incident reporting training annually; restrictive intervention training where used.
BDS Provider Staff Training Requirements for CIH and FS, revised January 2019
- ☐ **If the shift includes a med pass, a Core A/B certified DSP is on site.**
Core A/B is taught in person by a nurse who completed the BDS Train the Trainer course; 85 percent on each test and 100 percent on the demonstration. When group home residents are present, a certified DSP must be on site.
BDS Core A/B executive summary
- ☐ **Hours this week, before you say yes.**
Overtime applies past 40 hours under the federal Home Care Rule; Indiana adds no exemption. If the substitute is a paid relative or guardian of the individual, confirm the combined 40 hour cap across RHS Hourly, Respite and Workplace Assistance.
U.S. Department of Labor Home Care Rule (2013, in force); CIH fact sheet, August 2026
- ☐ **Documentation set up before the shift starts.**
For RHS Hourly and PAC the DSP starts and ends the visit in EVV in real time. The note carries the date, the a.m. or p.m. time, the issue or circumstance, and the staff member's last name and first initial. Confirm in your own AccelTrax setup when the record must be completed and submitted for approval.
IHCP banner BR202029; IHCP bulletin BT2025163; RHS service definition; AccelTrax V5 work reporting guide
- ☐ **If the shift includes driving, the substitute is cleared to drive.**
Valid driver's license on file, the vehicle insured and in the condition the RHS policy requires, and the individual's transportation needs (wheelchair, seating, supervision in the vehicle) noted in the plan and known to the DSP.
RHS service definition; the individual's PCISP
- ☐ **If the gap left anyone without required supervision, file the incident report within 24 hours.**
Inadequate staff support for an individual, including inadequate supervision, with the potential for significant harm, injury or death, is a reportable incident under the rule, and the BDS training FAQ says it is reportable regardless of whether staff were present. The case management provider follows up within 7 days and every 7 days until resolved.
460 IAC 6-9-5; BDS incident training FAQs

Three things to write down every time. Who called off and when. Who was offered the shift and when they answered. Who covered it, at what hours total for the week. That log is the difference between a staffing problem and a reportable one, and it is what a reviewer asks for first.
